

CONNECTING YOUR AGENCY WITH THE TXDPS ARCHIVE

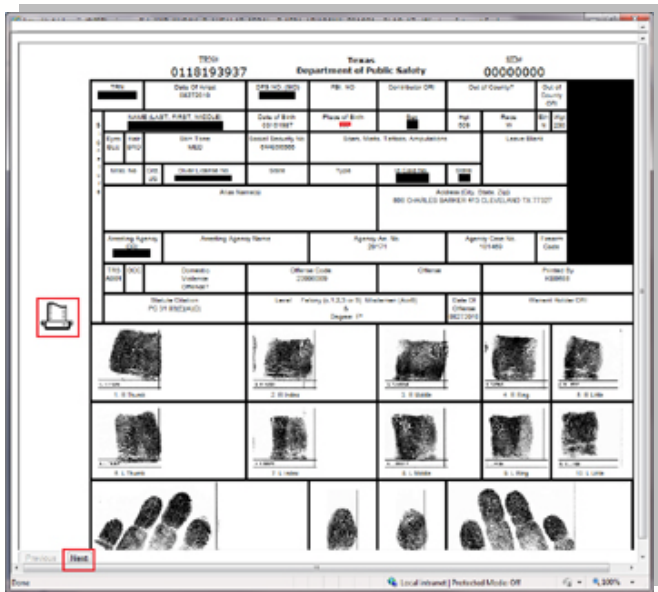

DPS CCH ARCHIVES

PRODUCT OVERVIEW

CBM Archives Company has been working closely with the Texas Department of Public Safety to provide state & local agencies the ability to view the electronically stored fingerprint and palm print images contained in the TXDPS archive via the World Wide Web. Biometric images can be viewed, studied and printed into the NIST format with just a click of a button. This allows agencies to quickly and accurately compare prints without having to contact DPS for a faxed copy, while usually distorts the images.

BENEFITS

- ✓ **High Quality Images:** The TXDPS fingerprint cards have been scanned in at a high resolution. This allows for crisp, clear and accurate images to be viewed and printed.
- ✓ **Quick Search Capabilities:** By simply entering a SID number or TRN number, the selected images can be downloaded in seconds.
- ✓ **Cutting Edge Viewer Capabilities:** The interface incorporates a high quality zoom feature that allows for an incredibly close view of a print.
- ✓ **Easy to Use Web Browser:** The CBM browser was kept simple and intuitive which allows for a successful record search the first time you use the program.
- ✓ **Unlimited Access:** Once installed, CBM allows unlimited view capabilities to each licensed workstation.

NOTE*

The archive web site is restricted to **latent personnel only**. The site was primarily designed to assist latent operators with verifying possible hits on latent prints. Agencies seeking access to the site should contact the DPS site administrator at 512-424-2089 to obtain authorized user information and user agreement documentation.

PRODUCT SPECIFICATIONS

SEARCH

Users can search for the finger print information of a person either by the State Identification Number (SID) or the Transaction Number (TRN). The process of building a search is simple and straightforward. The system allows a user to filter their results to view only transaction files that the user is looking for. The system interacts with the site archives externally to display the search results.

RESULTS

The results displayed contain the Date, SID, ORI, TRN, the type and the description of the file. The results are displayed based upon the search criteria. The number items returned can be changed by using the slide bar to select a value between 10-100.

A screenshot of the search results table. The table has columns for Date, SID, ORI, TRN, Type, Description, and View. The data rows show search results for various dates and transaction numbers, all of which are 'Electronic Fingerprint Transaction' files. The 'View' column contains a 'View' link for each row.

Date	SID	ORI	TRN	Type	Description	View
